Coni-Seal supplements their efforts in providing one-stop shopping for undercar products with the Hub Bearing Assembly product line.

As you've come to expect from a Coni-Seal product, the highest quality materials, extensive engineering and manufacturing consistency in every product are integral to our hub bearing assemblies.

- Quality materials provide less heat build-up.
- High temperature lubricant allows resistance to heat breakdown (-40° to 437° F).
- Impact resistant packaging guarantees precision components arrive in premium condition.
- Hardware kits (where indicated) always include the components required to do a complete job.
