RGZ Magneti Marelli After Market S.p.A. ha curato con particolare attenzione la stesura del presente catalogo; declina comunque ogni responsabilità per eventuali errori od omissioni relativi a schemi, disegni, corrispondenze con i codici O.E. ecc. e si riserva il diritto di apportare modifiche al contenuto senza l'obbligo di darne preventiva comunicazione. Sono particolarmente graditi, da parte degli utenti, commenti, segnalazioni di inesattezze e qualsiasi altro suggerimento atto a rendere più efficace la prossima edizione del catalogo.

GB

RGZ Magneti Marelli After Market S.p.A. has devoted its best attention to the editing of this catalogue; it nevertheless declines any responsibility for possible mistakes or omissions regarding figures, drawings, correspondence with O.E. codes etc. and it reserves the right to modify the contents without prior notice. Users' comments, reports of inaccuracies or any other suggestions which may in any way improve the next edition of this catalogue are warmly welcomed.

D

RGZ Magneti Marelli After Market S.p.A. hat diesen Katalog sorgfältig verfasst. Die Firma enthebt sich jeglicher Verantwortung für eventuelle Fehler oder Auslassungen hinsichtlich Schemen, Zeichnungen, Übereinstimmungen mit O.E. Codes usw. und behält sich das Recht vor, ohne Ankündigung, am Inhalt Veränderungen vorzunehmen. Anmerkungen, Fehlerhinweise und weitere Anregungen seitens der Kunden werden gerne entgegengenommen, um die nächste Ausgabe des Katalogs effizienter zu gestalten.

F

RGZ Magneti Marelli After Market S.p.A. a soigné avec une attention particulière la rédaction de ce catalogue; elle décline cependant toute responsabilité pour toute erreur ou omission éventuelle dans les schémas, les dessins, les correspondances avec les codes O.E., etc. et se réserve le droit d'en modifier le contenu sans obligation de communication préalable. Les commentaires, les signalisations d'inexactitudes et toute autre suggestion des utilisateurs susceptibles de rendre la prochaine rédaction du catalogue plus efficace seront particulièrement appréciés.

E

RGZ Magneti Marelli After Market S.p.A. ha cuidado con especial atención la redacción del presente catálogo; de todas maneras declina toda responsabilidad por eventuales errores o omisiones relativos a esquemas, diseños, correspondencia con los códigos O.E., etc., y se reserva el derecho de aportar modificaciones al contenido sin la obligación de previo aviso. Se agradecen especialmente los comentarios, las indicaciones de inexactitudes y cualquier otra sugerencia por parte de los usuarios que sean útiles para hacer más eficaz la próxima edición del catálogo.

P

RGZ Magneti Marelli After Market S.p.A. cuidou com particular atenção a redação do presente catálogo; como quer que seja, rejeita qualquer responsabilidade face a eventuais erros o omissões relacionados aos esquemas, desenhos, correspondências aos códigos O.E. etc. e reserva-se o direito de introduzir alterações ao seu conteúdo sem a obrigação de comunicação prévia das mesmas. São particularmente bem aceitos, comentários, sinalizações de inexactidões e qualquer outra sugestão idônea a tornar mais eficaz a próxima edição do catálogo.

I

È vietata la riproduzione, anche parziale, del contenuto del presente catalogo senza preventiva autorizzazione scritta della RGZ Magneti Marelli After Market S.p.A., che tutelerà i propri diritti a termine di legge.

GB

It is forbidden to reproduce, even partially, the contents of this catalogue without prior written consent from RGZ Magneti Marelli After Market S.p.A., who will protect its rights in accordance with the law.

D

Die Vervielfältigung, auch teilweise, des urheberrechtlich geschützten Inhalts des vorliegenden Katalogs ist ohne schriftliche Genehmigung durch RGZ Magneti Marelli After Market S.p.A. untersagt.

F

Il est interdit de reproduire même partiellement le contenu de ce catalogue sans autorisation écrite préalable de RGZ Magneti Marelli After Market S.p.A., qui protégera ses droits selon les termes de la loi.

E

Está prohibida la reproducción, total o parcial, del contenido del presente catálogo sin previa autorización escrita de RGZ Magneti Marelli After Market S.p.A., que protegerá sus propios derechos con arreglo a la ley.

P

É proibida a reprodução, também parcial, do conteúdo do presente catálogo sem a prévia autorização escrita de RGZ Magneti Marelli After Market S.p.A., que defenderá os próprios direitos, nos termos de lei.

Le spazzole tergicristallo - The wiper blades Die Wischerblätter - Les balais d'essuie-glace Las escobillas limpiaparabrisas - As escovas de limpa-vidros

I

Le spazzole Magneti Marelli soddisfano gli standard qualitativi richiesti dal primo impianto. La produzione è sottoposta a rigorosi test che ne assicurano la totale affidabilità.

La gomma, di nuova mescola, è ottenuta miscelando gomma sintetica e gomma naturale proveniente dalla Malaysia. Ad essa vengono aggiunti additivi che ne esaltano le caratteristiche di resistenza e durabilità. Tra questi in particolare il bromo, utilizzato in sostituzione della grafite, la rende più morbida e più compatta. Il tergente risulta così più silenzioso, resistente e duraturo.

Il ponte, realizzato in ferro lamellare, è sottoposto ai procedimenti di fosfatazione (per evitare l'ossidazione), di pittura cataforica (per renderlo più resistente) ed è rivestito da uno strato di poliestere che lo rende immune alle aggressioni degli agenti atmosferici.

Le parti in plastica (ponticelli, rivetti e spoiler) sono prodotte in linee completamente automatizzate e sono rinforzate con fibra di vetro che le rende indeformabili.

Lo spoiler, realizzato con una tecnica innovativa che prevede lo stampaggio tramite iniezione di gas, è più leggero e copre la spazzola per tutta la sua lunghezza contrastando efficacemente l'effetto air lift: la spazzola rimane perfettamente aderente al parabrezza anche alle alte velocità.

Fino a otto punti di pressione assicurano la perfetta aderenza della spazzola al parabrezza.

D

Die Wischerblätter von Magneti Marelli entsprechen dem Qualitätsstandard der Erstausrüstung. Die Produktion der Wischerblätter unterliegt strengen Produkttests, um eine absolute Zuverlässigkeit zu gewährleisten.

Das Wischergummi, eine neuartige Zusammensetzung aus synthetischem und natürlichem Gummi, wird eigens aus Malaysia importiert. Die Verarbeitung von zusätzlichen Inhaltsstoffen soll dazu dienen, die Widerstandsfähigkeit und die Lebensdauer des Wischergummis zu erhöhen. Insbesondere Brom, anstelle von Graphit, wird eingesetzt um das Gummi weicher und beständiger zu machen.

Dieses Herstellungsverfahren garantiert einen geräuscharmen Wischerbetrieb mit einer hohen Lebensdauer.

Die Brücke wird aus Eisenlamellen hergestellt. Sie wird sowohl einer Phosphatierungsbehandlung unterzogen, um eine Oxidation des Materials zu vermeiden, als auch mit einem Lack überzogen, der sie widerstandsfähig macht. Schließlich erfolgt der Überzug mit einer Polyesterschicht, um sie gegen Umwelteinflüsse zu schützen.

Die Plastikteile (Verbindungen, Nieten und Spoiler) werden auf einer vollautomatischen Produktionslinie hergestellt und sind mit Glasfasern verstärkt, die ihnen die nötige Stabilität verleihen.

Der Spoiler, der mittels einer innovativen Technik, dem Stanzen unter Verwendung von Gaseinspritzung, hergestellt wurde, ist somit leichter, überdeckt den Wischer über die Gesamtlänge und wirkt auf effiziente Weise gegen den Luftwiderstand auf der Windschutzscheibe. Mittels dieser Technik sowie dank der acht Haftpunkte bleibt der Wischer auch bei höheren Geschwindigkeiten vollkommen auf der Windschutzscheibe haften.

GB

Magneti Marelli wiper blades satisfy all of the quality requirements of the original equipment. Every single windscreen wiper is submitted to stringent testing that guarantees reliability.

The new mix of the rubber is obtained by mixing synthetic and natural rubber imported from Malaysia. To achieve more resistance and performance, bromine is added to the mix instead of graphite. This treatment gives a softer and more compact mix, resulting in a high quality, longer lasting, quieter blade.

The bridge, in lamellar iron, undergoes a phosphation process to avoid oxidation. A cathodic paint is applied to obtain resistance and is coated with a layer of polyester that protects it from atmospheric agents.

The plastic components (links, rivets and spoilers) are produced in completely automatic lines and are reinforced with fibreglass.

The spoiler is made by an innovative process of gas injection, resulting in a lighter product. The spoiler covers the length of the wiper blade, and reduces the air lift effect. The increased pressure on the blade makes the wiper perform better even at higher speeds.

F

Les balais Magneti Marelli correspondent aux standards de qualité exigés en première monte.

La production est soumise à des tests rigoureux qui assurent la totale fiabilité.

Le nouveau type de caoutchouc est obtenu en mélangeant de la gomme synthétique et de la gomme naturelle provenant de Malaisie.

On ajoute cette gomme des additifs qui en augmentent les caractéristiques de résistance et de durabilité.

Le brome, employé à la place du graphite, la rend plus souple et plus compacte.

De cette façon le balai est plus silencieux, résistant et durable.

Le pont, réalisé en fer lamellaire, est soumis aux procédés de phosphatation (pour éviter l'oxydation), de peinture Cataphorèse (pour le rendre plus résistant), il est recouvert d'une couche de polyester qui le rend plus résistant aux agressions des agents atmosphériques.

Les pièces plastiques (balanciers plastique, rivets et spoilers) sont réalisées en lignes de production complètement automatisées et sont renforcées avec de la fibre de verre qui les rend indéformables.

Le spoiler, réalisé avec une technique innovante, prévoit le moulage par injection de gaz, plus léger, il couvre le balai sur toute sa longueur en s'opposant efficacement à l'effet air lift: le balai reste parfaitement adhérent au pare-brise également à haute vitesse.

Jusqu'à huit points de pression assurent la parfaite adhérence au pare-brise.

P

As escovas Magneti Marelli satisfazem todos os requisitos do primeiro equipamento. A produção é submetida a rigorosos testes que asseguram a total fiabilidade.

A nova mistura de borracha, é obtida misturando borracha sintética e borracha natural proveniente da Malásia. Para obter maior resistência e performance a mistura é implementada com aditivos especiais como bromo, utilizado em substituição do grafite, tornando-a mais suave e duradoura.

A haste, em ferro lamelado, é submetida a um processo de fosfatização para evitar oxidação, com pintura cataforica (para torná-la mais resistente) e é revestida de uma camada de polyester que a torna imune às agressões dos agentes atmosféricos.

As partes em plástico (pontas, revestimentos e spoiler) são produzidas em linhas completamente automatizadas e são reforçadas com fibra de vidro que as torna indeformáveis.

O spoiler, fabricado a partir de uma técnica inovadora que contempla a estampagem através de injeção de gás, é mais leve e cobre a escova por toda a sua largura contrastando eficazmente o efeito de air lift: a escova mantém-se perfeitamente aderente ao pára-brisas mesmo a alta velocidade.

Até oito pontos de pressão asseguram a perfeita aderência das escovas ao pára-brisas.

E

Las escobillas limpiaparabrisas Magneti Marelli cumplen todos los requisitos de calidad exigidos a un equipo original. La fabricación de cada escobilla está sometida a rigurosos controles que aseguran su fiabilidad.

La goma de la escobilla se obtiene de la mezcla de goma sintética y goma natural importada desde Malasia. Con el fin de obtener mayor resistencia y rendimiento, esta mezcla lleva aditivos como el bromo, usado en sustitución del grafito que hace que la mezcla sea más blanda y compacta, y en consecuencia que la escobilla resulte más silenciosa y duradera.

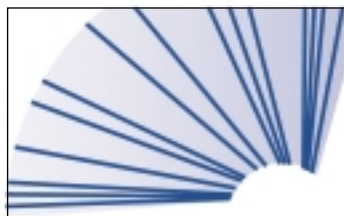

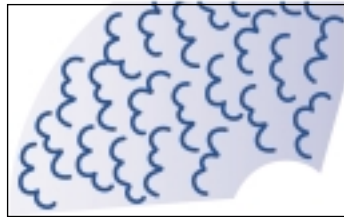

El puente, fabricado en hierro laminado, ha estado sometido a procesos de fosfatización (evitar la oxidación), de pintura catódica (más resistencia), y está revestido con una capa de polyester que lo protege de las agresiones atmosféricas.

Los componentes de plástico (articulaciones, remaches y spoilers) están fabricados en líneas completamente automáticas y vienen reforzados con fibra de vidrio que los hacen más indeformables.

El spoiler, fabricado con una técnica innovadora que contempla la estampación por medio de inyección de gas, es más ligero y cubre la escobilla en toda su longitud contrarrestando eficazmente el efecto del aire: la escobilla se mantiene perfectamente adherida al parabrisas incluso a altas velocidades. Hasta unos 8 puntos de presión hacen que la escobilla tenga asegurada la adherencia al parabrisas.

Quando e perché si cambiano le spazzole - When and why the wiper blades are changed.
 Wann sollten die Wischerblätter gewechselt werden? - Quand et pourquoi changer les balais
 Cuando y porqué hay que cambiar las escobillas - Quando e porquê se mudam as escovas

I

Scarsa tergenza

Lunghi periodo di riposo deformano il filo del tergente causando un effetto velo sul parabrezza.

Bande opache

La gomma del tergente indurisce o si deteriora con il tempo. Rimangono così sul parabrezza delle aree non deterse.

Rigature

La gomma del tergente si deteriora con il tempo o a causa del pulviscolo stradale dando origine a sottili linee semicircolari sul parabrezza.

Saltellamento

La deformazione della struttura della spazzola può causare saltellamenti del tergente, lasciando sul parabrezza linee radiali.

Sollevamento

La deformazione della struttura della spazzola può causare una imperfetta aderenza al parabrezza, soprattutto alle alte velocità.

Forti vibrazioni

Deformazione della spazzola, connettore errato, età o usura del tergente provocano rumorosi ed irregolari movimenti.

GB

Low wiping quality

Long periods without use can deform the wiper's profile causing a veil effect on the windscreen.

Opaque stripes

Time hardens and deteriorates the rubber, so eventually the wiper does not clean the whole surface of the windscreen.

Lines

Wear and tear of the rubber in the presence of dust can cause semicircular lines on the windscreen.

Jumping

Deformity of the wiper can cause jumping of the blade, this produces radial lines on the windscreen.

Lifting

Deformity of the wiper can also cause a loss of contact between the blade and the windscreen, especially at high speed.

Vibrations

Use of the wrong connector, wear and tear, age or deformity of the wiper blade, cause noisy and irregular vibrations.

D**Schwache Wischerwirkung**

Werden die Wischerblätter längere Zeit nicht benutzt, führt dies zu einer Deformation der Wischergummis und verursacht einen Schleier auf der Windschutzscheibe.

Streifenbildung

Mit der Zeit härten die Wischergummis aus und verschleifen. Teilweise werden so Bereiche auf der Windschutzscheibe nicht gesäubert.

Kratzer

Verursacht durch Straßenstaub verschleißt das Gummi, und mit der Zeit können Risse im Wischergummi entstehen. Es bilden sich feine halbkreisförmige Kratzer auf der Windschutzscheibe.

Sprünge der Scheibenwischer

Das Wischerblatt kann so deformiert sein, daß es zu Sprüngen des Wischers führen kann. Es entstehen strahlenförmige Streifen auf der Windschutzscheibe.

Das Wischerblatt haftet schlecht

Die Deformation des Wischerblattes, insbesondere bei hoher Fahrgeschwindigkeit, kann zu einer schlechten Haftung auf der Windschutzscheibe führen.

Starke Vibrationen

Falsche Steckverbindungen und Halterungen sowie allgemeiner Verschleiß der Wischerblätter verursachen Geräusche und unregelmäßige Bewegungen.

E**Poca limpieza**

Los largos períodos de reposo deforman el filo limpiador haciendo que se empañe el parabrisas.

Bandas opacas

La goma se deteriora y endurece con el tiempo quedando zonas del parabrisas sin limpiar.

Rayaduras

La goma de la escobilla se deteriora con el tiempo a causa de la suciedad, provocando rayadas en el parabrisas.

Saltos

La deformación en la estructura de la escobilla puede causar saltos de la misma, dejando líneas radiales sobre el parabrisas.

Levantamiento

La deformación de la estructura de la escobilla puede restar adherencia al parabrisas, sobre todos en los casos de gran velocidad.

Fuertes vibraciones

Las deformaciones, un adaptador erróneo, la antigüedad de la escobilla provocan ruidos y movimientos irregulares.

F**Essuyage insuffisant**

De longues périodes d'inactivité déforment le caoutchouc causant en effet un voile sur le pare-brise.

Bandes opaques

La gomme du caoutchouc se durcit et se détériore dans le temps. Sur le pare-brise, des zones restent non essuyées.

Rayures

La gomme du caoutchouc se détériore dans le temps à cause des pollutions routières formant des lignes semi-circulaires sur le pare-brise.

Sautillage

La déformation de la structure du balai peut causer des sautilllements du caoutchouc, laissant sur le pare-brise des lignes radiales.

Soulèvement

La déformation de la structure du balai peut causer une adhérence imparfaite au pare-brise, surtout à haute vitesse.

Vibrations fortes

La déformation du balai, le connecteur incorrecte, l'âge ou l'usure du caoutchouc provoquent des mouvements rainureux et irréguliers.

P**Pouca limpeza**

Longo períodos sem serem utilizadas causam um efeito de véu sobre o pára-brisas.

Tiras opacas

A borracha endurece e deteriora-se com o tempo, não limpando completamente o vidro.

Riscos

Com o tempo as borrachas ganham pó e ao serem utilizadas podem fazer riscos no vidro.

Saltitar

A deformação da estrutura da escova pode levar a que a escova salte e provoque riscos no vidro.

Levantamento

A deformação da estrutura da escova também pode causar uma imperfeita aderência da escova ao pára-brisas, sobretudo em alta velocidade.

Fortes vibrações

Deformações da escova, ligações incorrectas, idade e mexer na escova constantemente pode causar barulhos irregulares e vibrações.
