

## Automotive Cooling Products

Water Pumps | Timing Kits | Fan Clutches

**USMW**

*Professional Series*

US Motor Works has combined the strengths of a technologically oriented manufacturer, superior sales and service organization with a sophisticated global distribution network to keep our company on the forefront of the automotive marketplace.

With the focus of providing Automotive and Heavy-Duty engine parts and components, US Motor Works is constantly looking for ways to support its customers by increasing the availability of quality parts and components. Currently, US Motor Works manufactures a complete line of Automotive Cooling parts, Fuel Pumps and Heavy-Duty parts.

Precision engineering and manufacturing are essential to creating quality products you can depend on. At US Motor Works, quality begins with highly skilled engineers utilizing materials that meet or exceed OEM specifications, highly complex computer assisted design tools and state of the art equipment to manufacture premium parts.

Our specially trained technician's apply stringent quality control standards utilizing sophisticated technology to make sure that all US Motor Works products meet the rigorous demands of our customers. When you buy US Motor Works manufactured items, you are investing in technology that has been meticulously engineered, manufactured from the highest quality materials and thoroughly tested to assure accuracy, reliability and workmanship.

With more than 100 years of combined experience, we are committed to providing an extensive line of high quality products, the finest customer service and the best support program available in the automotive and heavy-duty market.

# WARRANTY POLICY

## US Motor Works, LLC

- USMW brand of US Motor Works, LLC products are warranted to be free from defects in material and manufacture, under normal use and service
- US Motor Works coverage will extend a full 12 months from the date of installation in an engine regardless of mileage or hours.
- US Motor Works will cover (replace free of charge or pay for) all labor and parts needed to repair the warrantable failure, including progressive damage to the engine concerned.

### **Conditions of the warranty are:**

1. US Motor Works must be notified by the customer before filing a warranty claim.
2. All warranty claims must be in writing and US Motor Works reserves the right to examine every single engine or part subject to a claim under this warranty
3. Price of parts will be based on the US Motor Works current price list or other accepted suppliers at US Motor Work's option. Cost of labor will be of reasonable hourly flat rate (overtime or holiday rates are not accepted).

### **The warranty is also subject to the following limitations:**

1. The provisions of this warranty shall not apply to any US Motor Works (USMW) brand part altered from its original specification (including but not limited to alterations in packaging and/or markings) or which has been misused, exposed to weather conditions, negligence or damage by accident.
2. The warranty shall be null and void, if the engine or vehicle is not maintained to the suggested OEM level. All receipts and record should be accounted for in the event it is requested for the warranty analysis.
3. This warranty is provided solely to direct customers of the US Motor Works and not any other party. It is the only agreement or obligation of US Motor Works. All other warranties, expressed or implied, including the warranties of merchantability and/or fitness for a particular purpose, are excluded.

# WATER PUMPS

USMW Water Pumps are designed with quality in mind. All product applications have been designed and tested to meet or exceed original equipment specifications. Our advanced research has implemented the use of efficient impellers, hubs, bearings and seals that will provide optimum cooling with performance and longevity. We use the highest quality material to create a stronger body design with less corrosion.

## GENERAL FEATURES:

- \* Leak tested and hub-pull tested to our high quality standards.
- \* Designed and manufactured with the best NEW unitized seals to ensure long, trouble-free performance.
- \* Each unit uses bearings designed as specified by the original equipment manufacturer to meet specific radial torque and axial load requirements of each application to give long bearing life.
- \* Every Water Pump is supplied with a quality mounting gasket and other accessories (seals/gaskets) necessary to properly complete the installation.
- \* Manufactured to original casting specifications for proper fit, easy installation and proper water flow for maximum cooling.

## INSTALLING YOUR NEW WATER PUMP.

please follow all instructions furnished with the pump. *Failure to follow instructions can void your warranty.*

Handle your new water pump with care. Never strike its shaft. This will damage its bearing. Always inspect the fan clutch, fan, belts and pulley when installing a new water pump. Before working on an engine, disconnect the battery ground cable. (Refer to the owner's manual and O.E.M. instructions for restarting after reconnecting it.)

### **CHECK EVERYTHING WHILE INSTALLING YOUR NEW WATER PUMP TO HELP AVOID FUTURE**

**NOTE:** The following can cause a water pump failure: Dirty or excessive coolant or systems; defective, bent or unbalanced fan; defective or unbalanced clutch; wrong belt tension; fan shroud or radiator interference; loose or broken motor mounts; striking the bearing shaft on its end.

Use a 50/50 mixture of new antifreeze and distilled water or its equivalent. (High mineral content, acid or alkaline water reduces pump life, voiding its warranty.) Increase the amount of antifreeze only if needed for your climate. A 50/50 ratio using low silicate antifreeze is best for optimum cooling and prolonged pump life.

**FOR YOUR PROTECTION, NEVER STAND IN LINE WITH THE FAN WHEN RUNNING THE ENGINE.**

## INSTALLATION INSTRUCTIONS:

### Follow this sequence:

1. Always thoroughly clean the entire cooling system, engine cavity and paint surfaces. Tighten any backplate bolts, as needed.
2. Position new gaskets on the pump using sealer on both sides.
3. Carefully install the new pump. **DO NOT STRIKE THE SHAFT.** Tighten the bolts using a crisscross pattern.
4. Turn the pump by hand. Be sure it turns freely.
5. Inspect and replace the thermostat or radiator cap if they are sticking or leaking.
6. Inspect and replace any hoses and belts with signs of wear or visible defects. Rubber parts over 4 years old should always be replaced.
7. Reconnect the hoses. Refer to the owner's manual or O.E.M. instructions for any special fill procedures. Fill the cooling system and inspect it for leaks. Always dispose of used coolant according to EPA requirements.

8. Inspect and replace any fan with cracks, bends, loose rivets, etc. **NEVER STRAIGHTEN A BENT FAN.**
9. **INSPECT AND REPLACE ANY FAN CLUTCH WITH EXCESSIVE Wobble, LOOSENESS OR LOSS OF OIL. A BAD OR MIS-ALIGNED CLUTCH WILL DAMAGE A WATER PUMP.**
10. Make sure any pulley or clutch sits squarely on the pump hub. Using lockwashers, torque the bolts evenly so all parts turn without wobbling.
11. Rotate the fan by hand to see if it wobbles: Maximum to be 3/32" at the outer edge if no clutch, 1/4" with a clutch.
12. On engines without automatic tensioners, adjust belts to proper tension using a tension gauge. Refer to any manufacturer's specs. Or adjust the belts for a deflection of 1/2" to 3/4". Inspect and replace any defective automatic tensioner or idler pulley.  
(NOTE: Automatic tensioners will normally tighten with use.)
13. Check fan blade tip clearance to the radiator and any shroud. Check any electric cooling fan to insure it is functioning properly.
14. Inspect and replace the motor mounts if there are signs of wear or spilling. Tighten any loose bolts.
15. Start the engine and run it until it reaches normal operating temperature. Check for smooth operation. However, **NEVER STAND NEAR OR IN LINE WITH THE FAN WHEN RUNNING AN ENGINE. FOR YOUR OWN PROTECTION, THE HOOD SHOULD BE CLOSED WHEN REVVING THE ENGINE.** Turn the engine off and check for leaks.

**THIS PRODUCT IS INTENDED FOR USE ONLY AS ORIGINALLY SPECIFIED BY THE CATALOG AND THE O.E.M. MANUFACTURER.**

**IF THE HEAT WARNING LIGHT OR TEMPERATURE GAGES INDICATE OVERHEATING, CHECK THE COOLING SYSTEM TO AVOID DAMAGE.**

**CAUTION: NEVER REMOVE THE RADIATOR CAP WHEN THE SYSTEM IS HOT.**

**NOT RECOMMENDED FOR AIRCRAFT USE.**

**CAUTION:**  
ENGLISH

- Always refer to OEM replacement interval guidelines, installation instructions, special tool requirements, and specifications before installing timing kit parts.
- Failure to follow the OEM instructions and guidelines will void any warranty expressed or implied.
- For maximum timing belt and system life, timing belts, tensioners and idlers should be replaced at the same time.
- Check for engine damage and check compression before beginning the job. Interference engines can experience valve to piston damage if a timing belt failure has occurred.
- Do not turn crankshaft or camshaft with timing belt removed.
- Observe all tightening torques.

**PRECAUCIÓN:**  
SPANISH

- Refiérase siempre al manual del fabricante para saber intervalos de reemplazo, instrucciones de instalación, requerimientos de herramienta especial y especificaciones antes de instalar partes de distribución.
- De no seguirse las instrucciones y guías del fabricante, invalidará cualquier garantía expresa o implicada.
- Para máxima vida útil de la banda y sistema del tiempo, la banda del tiempo, tensores y poleas deben reemplazarse al mismo tiempo.
- Revise algún daño en el motor, revise también la compresión antes de iniciar el trabajo. Los motores de interferencia pueden experimentar daño en las válvulas o los pistones si ha ocurrido una falla en la banda del tiempo.
- No gire el cigüeñal ni el árbol de levas con la banda removida.
- Observe todos los torques de apriete o ajuste.

## TIMING KITS WITH WATER PUMPS

US Motor Works is pleased to announce our new line of timing kits with water pumps including all the parts needed to do the job right!

OEM's recommend that timing belts should be replaced every 60,000 to 100,000 miles, they also recommend that all the components of the timing system should all be replaced at once.

Replacing all the timing belt system components at the same time assures the entire system will operate and perform correctly and to the OEM specifications. The US Motor Works TIMING KIT WITH WATER PUMP package allows you to replace all the components designed to work and fit together to the optimum conditions, while at the same time increase the sales and decrease the potential returns.

TIMING KIT WITH WATER PUMPS INCLUDE:

- NEW WATER PUMP (Including gasket(s) and all accessories needed)
- TIMING BELT(s)
- TENSIONER(s)
- IDLER(s)
- HYDRAULIC TENSIONER (if applicable)

# FAN CLUTCHES

USMW Fan Clutches are designed with quality in mind. All product applications have been designed and tested to meet or exceed original equipment specifications. Our advanced research and design in each of our fan clutches contain the highest quality material to create the most superior product available in todays market.

## GENERAL FEATURES:

- \* CNC Machined to Exact OE Specifications and Fit
- \* All Aluminum Body for Efficient Heat Dissipation
- \* High Quality Heavy Duty Bearing with Hi-Temp Moly Grease
- \* Broad Coverage for US Domestic and Import Vehicles
- \* Attractive / Informative Retail Packaging
- \* General Application Coverage / Clutch Specification / Industry Interchange  
Printed Directly on Stock Number Label

# NON-THERMAL FAN CLUTCHES

## An Economical Replacement Fan Clutch

- Non-Thermal Fan Clutches do not have a thermal spring.
- Non-Thermal Fan Clutches are continuously engaged.
- Non-Thermal Fan Clutches achieve proper RPM of the fan to properly keep the Engine cool.
