Spare Parts for Daewoo Cars

 Having a tradition since 1924, ASAM is one of the biggest industrial producers from Romania, its main activity being industrial and auto parts & subunits production.

By tradition ASAM SA is oriented towards research and innovation, having a consistent portfolio of patents and inventions. This concern still exists today maintaining tradition in this way. Due to this fact the product portfolio and the production capacities are permanently adapted to the internal requirements and for export that are growing bigger and more complex.

 Cu o tradiție încă din 1924, ASAM este unul dintre marii producători industriali din România, activitatea sa principală fiind producția de piese și subansamble auto și industriale.

Prin tradiție ASAM SA este orientat spre cercetare și inovație, având un portofoliu consistent de brevete și invenții. Această preocupare există și astăzi continuând tradiția. Datorită acestui fapt portofoliul de produse și capacitățile de producție sunt permanent adaptate cererilor interne și pentru export tot mai mari și mai complexe.

 Depuis l'année 1924, ASAM est l'un de plus grande producteurs industriels en Roumanie, son activité principale est la production des pièces et des subassembles auto et industrielles.

ASAM SA est traditionnellement orientée vers la recherche et l'innovation, avec un important portefeuille des brevets et des inventions. Cette préoccupation existe aujourd'hui en pursue la tradition. En raison de cette, le portefeuille de produits et des capacités de production sont constamment adaptés à la demande intérieure et pour exporter de plus en plus et complexe.

 С 1924 года, «ASAM» S.A. является одним из ведущих румынских производителей узлов и запасных частей для машиностроения и автомобилестроения.

По традиции «ASAM» S.A. ведет научно-исследовательскую и новаторскую деятельность, что свидетельствуется многими патентами. Таким образом, производственные мощности и продукция постоянно адаптируются требованиям внутреннего и зарубежных рынков.

ASAM SA was established in 1924 as The Administration of Aviation and Marine Establishments. In that moment it was functioning as a workshop of plane repairs for the 2nd Royal Military Flotilla. Starting with 1963, ASAM SA has ensured the repairs for trucks, tractors and utility vehicles (farm vehicles) of Russian and Romanian type. Since 1972 the new name is the Factory of Auto Parts (IPA in Romanian), the factory has started producing spare parts and assembles for cars and high tonnage equipment being an important supplier for ROMAN Brasov. Since 1991 IPA becomes again ASAM SA – (Auto Mechanical Assemblies & Subassemblies) Since 1992 ASAM SA has started producing car parts, and especially for Dacia cars, evolving and being still present today. In 2000 ASAM SA becomes a member of Conex Group Company and joins an intense retechnologization process, spreading the covering area of the manufactured products to different brands and models of cars, trucks and utility cars.

ASAM S.A. a fost înființată în 1924 ca Administrația Stabilimentelor Aviației și Marinei. În acel moment funcționa ca atelier de reparații avioane pentru Flotila a II - a Regală Militară.

Începând din 1963, fabrica se numea Întreprinderea de Reparații Auto (IRA) asigură reparațiile pentru camioane, tractoare și mașini agricole de producție rusească și autohtonă. Din 1972 noua denumire este Întreprinderea de Piese Auto (IPA), fabrica începând să producă piese de schimb și ansamble pentru mașini și utilaje de mare tonaj fiind un furnizor important pentru ROMAN Brașov. Din 1991 IPA redevine ASAM S.A – Ansamble și Subansamble Auto și Mecanice S.A. Din 1992 fabrica a început să producă piese pentru autoturisme, și în special pentru autoturismele DACIA, lucru care a evoluat și se realizează și astăzi. În anul 2000 ASAM S.A. devine membră a Grupului de Firme Conex, și intră într-un proces intens de rețehnologizare, aria de acoperire a produselor realizate extinzându-se la nenumărate mărci și modele de autoturisme, camioane și mașini utilitare.

ASAM SA a été fondée en 1924 en tant L'Administration de Les Établissements d'Aviation et de la Marine. A cette époque, a fonctionné comme un atelier de réparation des aéronefs pour la Flotte II - iemmé Militaire Royal.

Depuis 1963, l'usine s'appelle Auto Repaire Entreprise (IRA); l'usine prévoit des réparations pour les camions, les tracteurs et les machines agricoles de production russe et autochtone. En 1972, le nouveau nom est Auto Pièces Entreprise (IPA), l'usine a commencé à produire des pièces de rechange pour les machines et les assembles pour la machinerie lourde étant un fournisseur majeur pour le ROMAN Brasov.

Depuis 1991, IPA restauré ASAM SA - Ensembles et Sous-ensembles Auto et Mécanique. Depuis 1992, l'usine a commencé à produire des pièces pour les voitures, et en particulier pour les voitures Dacia, qui a évolué et est aujourd'hui réalisée.

En 2000 ASAM S.A. devenir un membre de la Groupe des Sociétés Connex, et entrer dans un processus intense de modernisation, fabrique en s'étendant à de nombreuses marques et modèles de voitures, camions et voitures utilitaires.

«ASAM» S.A. действовала под названием: Administrația Stabilimentelor Aviației și Marinei (Управление Предприятиями Авиации и Морского флота), где ремонтировались самолеты II – й Королевской Военной Флотилии.

В 1963 г. действует под названием Întreprinderea de Reparații Auto (I. R. A.): ремонт грузовиков, тракторов и сельскохозяйственной техники румынского и советского производства. В 1972 г., под названием Întreprinderea de Piese Auto (I. P. A.), производит запчасти и узлы для тяжелой техники оборудования, в т.ч. и для грузовиков «ROMAN» – Брашов. С 1991 г. I. P.A. становится снова «ASAM» S.A. - производство узлов и запчастей для автомобильной промышленности, а с 1992 г. - деталей для легковых автомобилей, в т.ч. для автомобилей DACIA и Daewoo, проект который постоянно развивается и на сегодняшний день. В 2000 году «ASAM» S.A. при входе в состав Группы фирм «Conex» начинает интенсивный процесс переоборудования и модернизации. При этом, постоянно расширился ассортимент продукции, который включает запчасти для многих марок автомобилей и грузовиков.

 ASAM owns a modern foundry line with automatic moulding and performant induction furnaces with controlled atmosphere. It is biggest foundry of this type in Moldova, having a moulding capacity of 10 tons on a shift. ASAM laboratories are specialized in chemical analysis, metrology and mechanical tests, spectral analysis for moulded steels and metals, metallographic analysis, mechanical tests, hardness measurements. ASAM laboratories have RENAR accreditation. ASAM forge is equipped with press machines with big capacity, from 400 up to 1000 tons and a maxi press of 10.000 tons power. These equipments allowed the assimilation during manufacturing process of some forged parts being extremely complex. The matrices used in forging processes are designed and executed by ASAM specialists in SDV own division. The forge division owns 2 furnaces of medium capacity with controlled atmosphere – ensuring optimum heating of the semimanufactured good and high quality of the forged parts.

 ASAM dispune de o linie modernă de turnare cu formare automată și cuptoare de inducție performante cu atmosferă controlată. Este cea mai mare turnătorie de profil din Moldova, având o capacitate de turnare de 10 tone pe schimb. Laboratoarele ASAM sunt specializate în analize chimice, metrologie și încercări mecanice, analize spectrale pentru oțeluri turnate și metale, analize metalografice, teste mecanice, măsurări ale durității. Laboratoarele ASAM sunt acreditate RENAR. Forja ASAM este dotată cu prese de mare putere, de la 400 până la 1000 de tone, și o maxi presă de 10.000 de tone forță. Aceste dotări au permis asimilarea în fabricație a unor piese forjate extrem de complexe. Matrițele utilizate în procesele de forjare sunt proiectate și executate de specialiștii ASAM în secție proprie de SDV. Secția forja dispune de două cuptoare de capacitate medie cu atmosferă controlată – asigurând încălzirea optimă a semifabricatului și o calitate superioară a reperelor forjate.

 ASAM a une ligne moderne de fonderie avec formation automatique et des fours à induction performants avec atmosphère contrôlée. Elle est la plus grande usine avec ce profil dans la Moldavie, avec une capacité de moulage de 10 tonnes par quart de travail.

Les laboratoires du ASAM sont spécialisés dans l'analyse chimique, de métrologie et d'essais mécaniques, l'analyse spectrale pour les moulages d'acier et des métaux, l'analyse métallographie et essais mécaniques, mesures de dureté. Les laboratoires ASAM sont accrédités RENAR. La forge ASAM est équipée avec presses mécaniques de grande puissance à partir de 400 à 1000 tonnes et une grande presse de 10.000 tonnes. Ces installations ont permis à l'assimilation de la fabrication des pièces forgées très complexe. Moulés utilisés dans les processus d'établissements sont conçus et réalisés par des spécialistes ASAM dans sa propre section SDV. L'atelier de la forge a deux fours de capacité moyenne avec atmosphère contrôlé - assuré le chauffage optimal pour le semi-fini et une supérieur qualité pour les pièces forgées.

 «ASAM» S.A. оснащен современной автоматической линией литья и индукционными печами с контролируемой атмосферой, где могут отливаться 10 тонн деталей в смену.

В лабораториях «ASAM» S.A. производятся: химический анализ, механические испытания, метрологические измерения, спектральный анализ стального литья и металлов, металлографические исследования и измерение твердости. Лаборатории «ASAM» аккредитованы RENAR. Контроль качества продукции «ASAM» S.A. обеспечивается опытным высококвалифицированным персоналом при помощи универсальных и специальных приборов и инструментов. Кузнечный цех «ASAM» S.A. оснащен мощным прессовым и вспомогательным оборудованием (прессы от 400 до 1000 тонн, макси-пресс в 10000 тс, нагревательные печи), которое позволяет изготавливать комплексные поковки. Штампы спроектированы и изготовлены специалистами «ASAM» в собственном инструментальном цехе.

ASAM-SA
tradition since 1924.

ASAM owns a division of mechanical processing through splintering, with 5 distinct lines of manufacture that ensure the simultaneous development of many production processes. ASAM investments in this division are major and they consist in machine tools acquisition with a state of-the-art numerical command, in this way increasing quality and precision of the manufactured products. ASAM brand is recognized on the market with tradition for: clutch mechanisms – clutch disks and pressure plates – brake pumps, brake cylinders, brake limiters, brake disks, bendix system, and cardan (cross) universal joints, steering connecting rod, and pivots. The quality control of the products manufactured in ASAM is ensured by the technicians' teams that have high qualifications & an experience of more than 10 years in manufacturing processes. The inspections are achieved with universal measuring instruments and with special control devices, ensuring in this way the isolation of the products that are not in conformity.

ASAM dispune de o secție de prelucrări mecanice prin așchiere, cu 5 linii distincte de fabricație care asigură derularea în paralel a mai multor fluxuri de producție. Procesele de prelucrare se execută pe mașini-unelte clasice, universale și specializate. Investițiile ASAM în această secție sunt majore și constau în achiziționarea de mașini unelte cu comandă numerică de ultimă generație, crescând calitatea și precizia produselor executate. Marca ASAM este recunoscută în piață cu tradiție pentru: mecanisme de ambreiaj - discuri de ambreiaj și plăci de presiune, pompe frână, cilindri frână, limitatori frână, discuri de frână, bendixuri, cruci cardan, bielele de direcție, pivoți. Controlul calității produselor executate în ASAM este asigurat de echipe de tehnicieni de înaltă calificare cu experiență de peste 10 ani în procesele de fabricație. Verificările se realizează cu instrumente de măsură universale și cu dispozitive speciale de control, asigurându-se izolarea produselor neconforme.

Le portfolio des produits ASAM inclut: parts auto consommables pour les voitures roumaines et étrangères partis et consommables auto pour les voitures roumaines et étrangères, partis et consommables auto pour les voitures de grand tonnage camions et véhicules agricoles. La marque ASAM est reconnue sur le marché avec tradition pour: les mécanismes d'embrayage - disques embrayage et plaques de pression - pompes de frein, cylindres de frein, limiteurs de frein, disques de frein, système bendix, et joints de cardan universels (croix), bielle de conduite et pivots. La principale préoccupation des nos spécialistes est le développement du portefeuille des produits ASAM. Un programme extensif se développe, pour implémenter de parties nouvelle les plus fréquentes.

Механическая обработка производится на 5-ти линиях, которые позволяют одновременную обработку разных деталей на классических, универсальных станках. Большие инвестиции были направлены на приобретении современных станков с ЧПУ, обеспечивая высокое

качество и точность изделий.

Товарная марка «ASAM» S.A. известна на рынке как производитель систем рулевого управления и сцепления, узлов тормозных систем и др.

 From 2003 ASAM SA is TUV ISO 9001/2000 certified. Internally, ASAM products and processes are certified from the qualitative point of view by the competent authorities. (RAR, AFER - OCS, OMCAS). ASAM is ISO TS 16949 approved – fact that allows providing components for the first montage to car & truck manufacturers.

Having in mind the continuous increase and diversification of parts and consumables demand for auto market, the commercial division supports the diversification of ASAM products portfolio with import initiatives that allow the introduction in the commercial circuit, and also in the production process new parts. The products are permanently tested by ASAM specialists, ensuring standards observation and they are certified by competent authorities also on manufacturing flow, and also on products lots.

 Din 2003 ASAM S.A. este certificat TUV ISO 9001/2000. Pe plan intern, produsele și procesele ASAM sunt certificate din punct de vedere al calității de autoritățile competente (RAR, AFER - OCS, OMCAS). ASAM este agrementat ISO TS 16949 – fapt ce permite furnizarea de componente pentru prim montaj constructorilor de autoturisme și camioane.

Având în vedere cererea în creștere și diversificare continuă pentru piese și consumabile pentru piața auto, divizia comercială sprijină diversificarea portofoliului de produse ASAM cu inițiative de import care permit introducerea în circuitul comercial, dar și în procesul de producție repere noi. Produsele sunt permanent supuse testărilor de către specialiștii ASAM, asigurându-se respectarea standardelor și sunt certificate de către autoritățile competente atât pe flux de fabricație, cât și pe loturi de produse.

 Depuis 2003 ASAM S.A. est certifié TUV ISO 9001/2000. En interne, les produits et les processus ASAM sont certifiés en termes de qualité des autorités compétentes (RAR, AFER - SCO, OMCAS). ASAM est intimement ISO TS 16949 - permettant la fourniture de composants pour les fabricants de premier montage de voitures et de camions.

Compte tenu de l'augmentation de la demande et la diversification continue des pièces et consommables pour le marché automobile, la Division Commerciale soutient la diversification de portefeuille ASAM avec des initiatives d'importation qui permettent l'introduction aux circuits du commerce, mais aussi dans le procès de production de repères nouveaux. Les produits sont testés en permanence des spécialistes ASAM, assurer le respect des normes et sont certifiés par les autorités compétentes pour le flux de fabrication, et pour les lots de produits.

 С 2003 года «ASAM» S.A. сертифицирован TUV ISO 9001:2000. На внутреннем рынке продукция и производство сертифицированы компетентными организациями контроля: RAR, AFER - OCS, OMCAS.

Сертификат ISO TS 16949 дает «ASAM» S.A. право на поставку компонентов на конвейер производителям автомобилей и грузовиков. Ввиду повышения спроса на автозапчасти и их разновидности, коммерческий отдел поддерживает ассортимент изделий путем освоения и внедрения в производство новой импортной продукции., которая постоянно испытывается специалистами «ASAM» S.A. и проверяется и сертифицируется компетентными организациями на потоке производства и по-партиям.

ASAM-
SA
Tradition since 1924.

Developing a diversified range of products and consumables for new generation cars, Romanian and foreign, represents a major objective of ASAM SA producer. Accomplishing this objective will ensure maximum chances in the consecration of ASAM brand on a decisive position on auto parts market from Romania and not only here.

ASAM products portfolio includes: auto parts and consumables for Romanian & foreign cars, auto parts and consumables for high-tonnage cars (trucks and agricultural vehicles). The evolution of auto parts portfolio for cars started from Dacia 1300, 1310, 1400, 1304, 1307, Dacia Pick-up 1,9D car parts. Gradually, the portfolio has developed and develops continuously on Dacia Nova, SuperNova, Solenza, Logan and Daewoo (Cielo, Matiz, Tico, Espero). ASAM products portfolio destined for cars has a plurality of advantages that ensure the premises of an ascendant evolution on the market. Quality-price ratio of these products represent an advantage, being a viable choice for car owners. The main concern of our specialists is the development of ASAM products portfolio. An extensive development program is expanding, for implementing new parts that are addressed for both Dacia Logan cars, and also the most frequent new brand foreign cars.

Dezvoltarea unei game diverse de piese și consumabile pentru autoturismele de nouă generație, autohtone și din import, constituie un obiectiv major al producătorului ASAM SA. Realizarea acestui obiectiv va asigura șanse maxime în consacrarea mărcii ASAM pe o poziție decisivă în piața pieselor auto din România și nu numai.

Portofoliul de produse ASAM cuprinde: piese și consumabile pentru autoturisme autohtone și de import, piese și consumabile pentru mașini de mare tonaj (camioane și mașini agricole). Evoluția portofoliului de repere pentru autoturisme a plecat de la piesele pentru Dacia 1300, 1310, 1400, 1304, 1307, Dacia Papuc 1,9D. Treptat, portofoliul s-a dezvoltat și se dezvoltă în continuare pe Dacia Nova, SuperNova, Solenza, Logan și Daewoo (Cielo, Matiz, Tico, Espero). Portofoliul de produse ASAM destinate autoturismelor deține un cumul de avantaje care asigură premisele unei evoluții ascendente în piață. Raportul preț-calitate al acestor produse constituie un avantaj, fiind o alegere viabilă pentru posesorii de autoturisme. Preocuparea majoră a specialiștilor noștri este dezvoltarea portofoliului de produse ASAM. Există în derulare un program amplu de implementare de noi repere care se adresează atât autoturismelor Dacia Logan, dar și celor mai frecvente autoturisme din import de nouă generație

La marque ASAM est reconnue sur le marché avec tradition pour: les mécanismes d'embrayage - disques embrayage et plaques de pression - pompes de frein, cylindres de frein, limiteurs de frein, disques de frein, système bendix, et joints de cardan universels (croix), bielle de conduit et pivots. L'évolution du portefeuille des parts auto pour les voitures a commerce de Dacia 1300, 1310, 1410, 1307, 1304, Dacia Pick-up 1.9D, parts de voiture. Graduellement, le portefeuille a commencé à se développer et se développe continuellement sur Dacia Nova, SuperNova, Solenza, Logan et Daewoo (Cielo, Matiz, Tico, Espero, Nexia). Le portefeuille des produits ASAM destiné pour les voitures a une pluralité d'avantages qui assure les prémisses d'une évolution ascendante sur le marché. La rate qualité - prix de ces produits représente un avantage, étant un choix viable pour les propriétaires de véhicules.

Основная деятельность наших специалистов – это развитие ассортимента продукции, при внедрении новых программ для а/м Dacia Logan, и импортных машин нового поколения.

Постоянное развитие ассортимента запчастей для отечественных и зарубежных марок автомобилей нового поколения является главным направлением деятельности «ASAM» S.A. Выполнение этой цели позволило торговой марки «ASAM» S.A. занять важное место на румынском и зарубежных рынках автозапчастей.
